Notice of Allowance

This is the Notice of Allowance for application number 10/632,304 D-Ring Retainer, filed on 8/1/03. Claims 1-6, 8, 9 and 21-27 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The reason is that the prior art does not teach a retainer for securing items in a vehicle having an upper component and a lower mounting base with a central opening, the lower mounting base including a rail extending outwardly from and across the mounting base upper surface and a release member extending radially outward from the central opening having a fixed end and a free end, the free end being moveable to permit the slideable release of the upper components from the lower mounting base, such that when released the lower surface of the upper component is caused to slide across the mounting base upper surface in combination with the upper component having at least one rail extending outwardly and across the lower face of the upper component and a central rib extending outwardly from and across the lower surface of the upper component, which engages the release member and a retainer leg.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
